Hi all,

FYi. Grandview will be closed tomorrow for repairs- if they get the drill rig up Kirkwood by then. The 90,000 lb drill rig and 20,000 lb trailer are stuck at the bottom Kirkwood with a broken axle. This project hasn't even been going a week and there are already major equipment problems. Imagine how's going to be with someone building a mansion in exactly the same spot on Grandview right after these repairs are completed. These repairs will take a couple of months - building a mansion will take several years. Just sayin' . . .

Happy holidays

Skip

A couple weeks ago, I love how they parked the tractor in front of the "fire hydrant" and at the largest turnaround point. And I loved they parked it there during the weekend meaning it was unattended! What if a fire truck needed to use a fire hydrant during the weekend and how would a fire truck turn around? I take a quick snapshot of the tractor there during trash day. The trash guy was so annoyed that he had to get out of his truck and move all the trash cans over. I believe the contractors think and looks like a great spot to stage or park large equipment at but they don't think and know the reality of that turnaround point. Please note I do support them 100% fixing the road. I'm sure they're trying and doing their best, as we do need these roads repair. This will be good to document all this chaos for the next two months to protest future privately funded projects. I believe this is a blessing in disguise how are going to use this street repair photos to fight with these new projects in the forecast.

Happy new years and thank you for all the updates

Under no circumstance should a vehicle be blocking a fire hydrant. While there are at times going to be extenuating circumstances with vehicle parking during this necessary repair it should not interfere with the ability to access a hydrant. Please alert our office immediately should this happen again or call LADOT's parking enforcement division. They can be reached at 818-374-4823 and then by selecting option 2.

Sincerely,

Julia
